

# Diversity dynamics. How local religious groups are born, stay, and die over time

## Authors:

Jeremy Senn, University of Lausanne

Jörg Stolz (dir.), University of Lausanne

Christophe Monnnot, University of  
Strasbourg

# Introduction

# Religious diversity

- Consensus: rising congregational religious diversity in the West (Körs 2017, Rebenstorf 2018, Krech 2009a, Becci, Burchardt, and Giorda 2016, Giordan 2018, Pace 2018, Martinez-Arino 2018, Fons Duocastella, Luque Capellas, and Forteza Gonzales 2012, Vejrup Nielsen 2018, Qvortrup, Fibiger 2009, Eck 2002).

# Introduction

# Introduction

Common limitations when measuring congregational diversity :

- One wave: diversity of the past is measured retrospectively
- Geographical limitations
- Denominational Limitations

## Central questions

1. How many congregations have been born, stayed, and disappeared in the different religious traditions?
2. How has congregational diversity evolved in Switzerland over the last ten years?
3. What determinants account for the probability of a congregation to disappear?

# Method

# Data

1. Census 2008

2. Census 2020

3. NCS 2008

representative sample of congregations

interviews with one key informant per group

N = 1040

# Censuses Methodology

- Definition of "congregation" (Chaves 2004)
- Additional definitions and rules (Stolz & Monnot 2018)
- A "search" conducted by religious tradition or current
- Three steps

# Measure of religious diversity

Congregational religious diversity = the existence of local religious groups of different religious traditions in a given territory

Measuring diversity : 1 – Herfindahl-Hirschman Index

$$Diversity = 1 - \sum_{i=1}^n x^2$$

with n = number of groups, x = percentage of the groups belonging to religious denomination i

# Results

**How many congregations have been born, stayed, and disappeared in the different religious traditions?**

# Declining number of congregations

N congregations

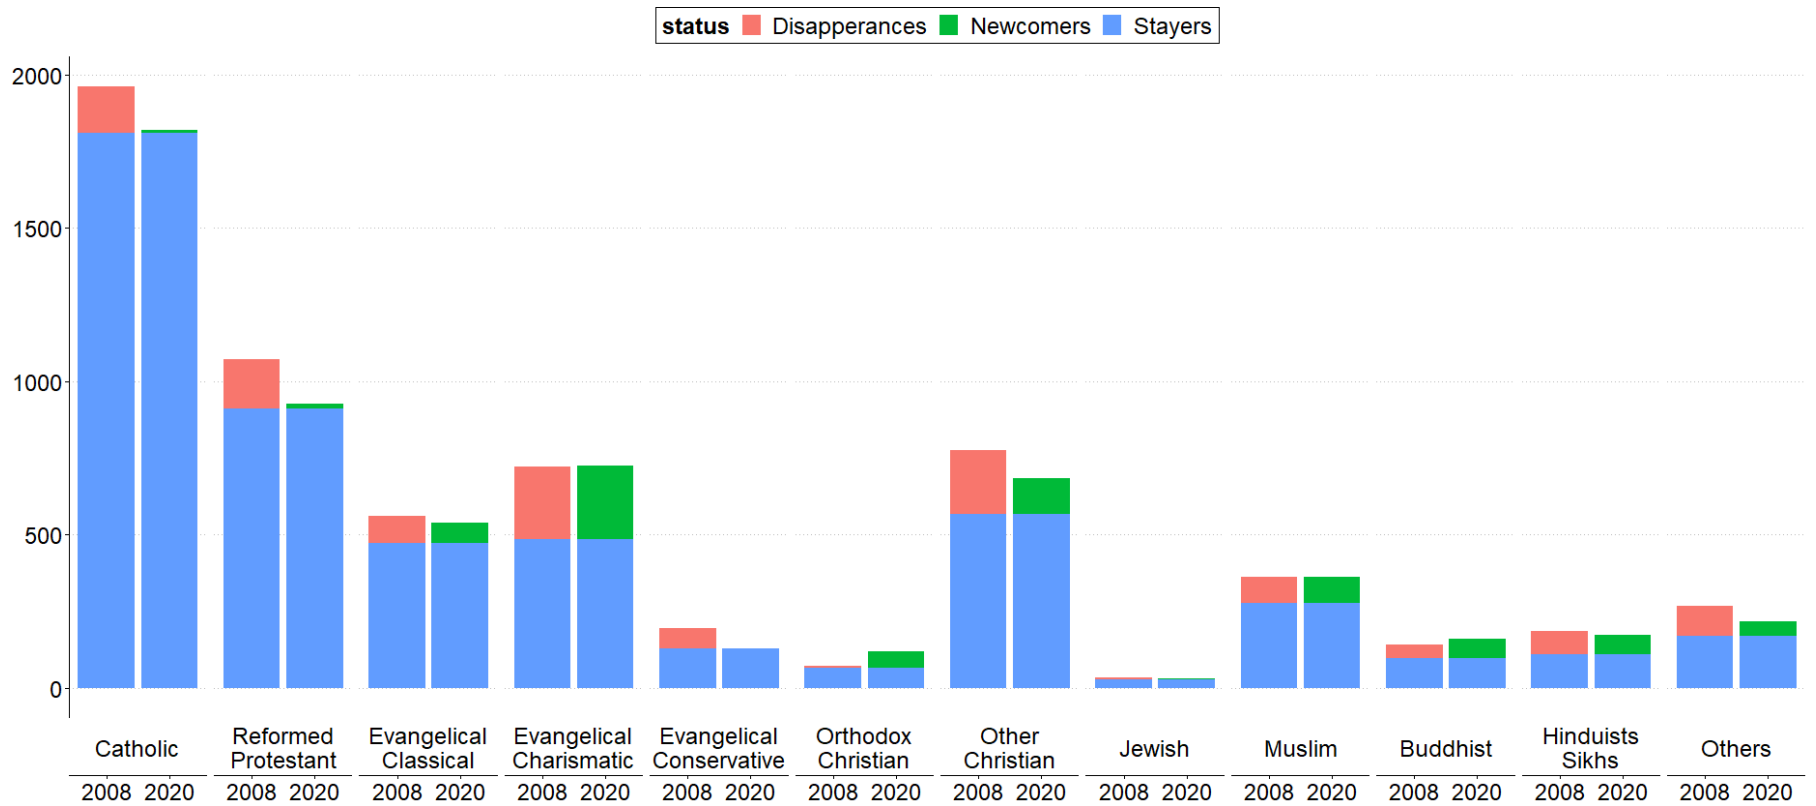

2008 : **6341**

2020 : **5885**

# Decline in the number of congregations

# appearingcomer, Stayers, and Disappearances

**How has congregational diversity evolved in Switzerland over the last ten years?**

# Mergers

Number of disappeared congregations

# Conclusion

# Conclusions

1. Decline in the number of congregations.
2. Stability in religious diversity
3. Proportions of newcomers, stayers, and disappearances varies strongly between religious denominations.
4. Having a physical space in the congregation to socialize is more protective of closure than money or space ownership
5. Disappearance of established denominations (Reformed Protestant, Catholics) happens exclusively by mergers, non-established groups almost never merge.

# Appendix 1

*Table A3 Coding of religious tradition variables*

Trad	Codings
Trad3:	Established Christian, non-established Christian, non-Christian.
Trad6:	Christian, Jewish, Muslim, Buddhist, Hindu/Sikh, Other
Trad12:	(Roman) Catholic, Reformed Protestant, Evangelical (Classical), Evangelical (Charismatic), Evangelical (Conservative), Orthodox Christian, Other Christian, Jewish, Muslim, Buddhist, Hindu/Sikh, Other.
Trad16:	(Roman) Catholic, Christ Catholic, Reformed Protestant, Evangelical (Classical), Evangelical (Charismatic), Evangelical (Conservative), Orthodox Christian, Messianic (e.g. Jehovah's Witnesses, Latter Day Saints, 7th Day Adventists), Neo-Apostolic, Other Christian, Jewish, Muslim, Buddhist, Hindu/Sikh, Baha'i, Other.
Trad35:	Roman Catholic, Christ Catholic, Reformed Protestant, Neo-Pietist, Independent Pietist, Anabaptist, Baptist, Methodist, Quaker, Salvation Army, Darbyist, Pentecostal and other charismatic, Other evangelicals, Lutherans, Anglicans etc., Neo-apostolic, Messianic (Jehovah's Witnesses, LSD etc.), Christian Orthodox, Christian Science, Other Christian, Jewish, Muslim, Sufi, Alevites, Baha'i, Buddhist, Hindu, Neo-pagan, Sikh and Sant Mat, Neo-revelation, Theosophy, Spiritist and mediumnic groups, Scientology, Rosicrucian, UFO movements, Others

# Appendix 2

- Diversity Scores
  - Calculated over 2 periods (2008 and 2020)
  - Calculated on 2 levels
  - Calculated with 4 different religious classifications
